Precision straight blades for clean lines, body work and finishing. **46 models**

DS-001

6 Inch Straight Shears

Types: Ball Tip, Double Finger Rests - Flipper, Engraved Handles, Opposing Handle Flippable, Cream Handles

- ◆ Japanese Stainless Steel 440C
- ◆ Built-in Finger Rests
- ◆ Offset Concept
- ◆ Black Adjustable Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Ergonomic Design for Comfort and Precision
- ◆ Lightweight Construction
- ◆ Offset Handle Design
- ◆ Premium Quality Construction for Professional Use
- ◆ Heat Treated Blades
- ◆ Durable carrying case
- ◆ Soft grip handle for added comfort and control
- ◆ Easy to clean
- ◆ Convex edge design
- ◆ Asilencer/muffler attached to reduce noise

Have you grown tired of repeatedly using the same old-fashioned shears that cause splinters in your fingers and don't even provide a neat cut? If yes, bid farewell to all your problems because our new 6-inch straight shears with an ergonomic design will make your life easier and take your craftsmanship to another level.

The superior comfort design allows the shears to fit your hand like a glove, so you never have to worry about resting your fingers after every few minutes. The Japanese steel, paired with the convex design and adjustable screw assembly, provides ample power to make clean cuts without leaving any rough/blunt ends.

The extra sharp blades will make the trimming and grooming sessions much faster, allowing you to finish your work quickly and with the desired comfort. Moreover, if you ever feel that the blades are a little less sharp according to your taste, we have made beveled edges on the shears so you can sharpen them as much as you prefer.

Derpa understands how important your dog's grooming is to you; hence we have made the shears so durable that they are sure to last you a lifetime.

Buying our product would mean you never have to worry about blunt, rusty, non-efficient shears again.

Another amazing feature about these 6-inch straight shears is their soft grip, so they don't cut into your bones. The grip is softened with rubber on the inside, giving your fingers a cushioning effect. In addition, the adjustable screw allows you to decide the toughness you want in the blade according to the type of fur you are cutting.

Being a professional pet groomer, you would understand the importance of a neat trim for you and the pet owner. As client satisfaction is your number one priority, you know that an efficient shear can help you achieve that easily.

Our shears are made from the most durable Japanese steel, and the blades are made precisely to serve the purpose they are used for rightfully. Besides, the 6-inch length with a straight design is perfect for overall grooming and accessing areas that might have been challenging with a longer blade.

So what are you waiting for? Get your 6-inch Straight Shears today and level up your grooming skills instantly!

DS-002

6.5 Inch Straight Shears (Narrow Blade + Serrated)

- ◆ Japanese Stainless Steel 440C
- ◆ Flippable Model
- ◆ Slim Narrow Blades
- ◆ One Blade Serrated
- ◆ Removable Finger Rests
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners

Are you sick of the inefficient shears that would stop cutting in the middle of a grooming session and would also leave rough ends? Surely you wouldn't want to cause any pain to the puppy and anger the owner.

Well, then, what's the solution? Worry not, as Derpa has brought the dynamic 6.5-inch straight shears, which are perfect for grooming pets. These hassle-free shears are your best go-to solution if you want to improve your grooming skill and satisfy your pet owners.

Comfort is an exceptional feature of these 6.5-inch straight shears because we understand that your hands and fingers should be energized to perform a quick and clean cut. The shears have a special swivel thumb ring and a built-in finger rest, allowing you to maneuver them effortlessly.

Moreover, there are removable finger inserts inside the thumb ring and the finger rest to ensure that they fit your fingers perfectly. Everyone has different thicknesses and lengths of fingers; hence it would be silly to expect one size to fit all. Using the removable finger inserts, you could adjust the shears' fit as per your preferences.

When we talk about the comfort of shears, weight is yet another important factor many people ignore. A heavy set of shears would be a burden on your fingers and would make you tired easily.

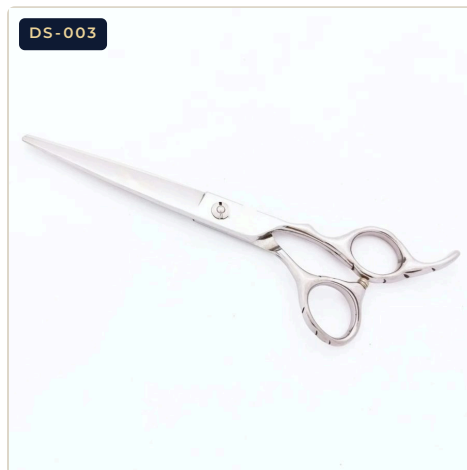

Hence, we have kept the shears lightweight so that they are lighter and easier to use and can be carried along with you. This makes them portable and

proves them to be your number one choice when it comes to selecting shears.

Another desirable feature of the 6.5-inch straight shears is their sharpness. Derpa has paid conscious attention to the blades' size, shape, and sharpness to ensure that they provide a fresh, neat cut.

The blades are made from top-notch Japanese steel, and the shape of the blades has been kept straight for even cuts. Besides, the blades are sharpened enough to provide seamless cutting and trimming. However, if you want a harder/softer cut, you can always adjust that through the adjustable screw.

The 6.5 Inch straight shears are an impeccable choice for a professional groomer. If you want an easy grooming session with much control over the shears rather than the other way around, you need to buy these right now!

7 Inch Straight Shears

Types: Flippable Concept, Offset Floral Shank, Offset Flat Screw, Offset Serrated Wider Blade

- ◆ Japanese Stainless Steel 440C
- ◆ Opposing Handle Flipper
- ◆ Ergonomically designed for Comfort and Efficiency
- ◆ Lightweight design for easy maneuverability
- ◆ Ideal for General Grooming, Finishing, and Thinning of Coats
- ◆ Premium Quality Construction for Professional Use
- ◆ Heat Treated Blades
- ◆ Durable carrying case
- ◆ Perfect Balance of Strength and Flexibility
- ◆ Suitable for All Types of Coats
- ◆ Great for creating Textured Layers

Have you been facing difficulties in your grooming sessions because your shears are not good enough? Do they give you a feeling of discomfort, and by the moment you hold them, it feels as if they're cutting into your thumb and fingers? Does this also mean that you face many hindrances during cutting and can't work efficiently?

If so, Derpa has brought you the finest 7 inch straight shear you will ever find perfect for everyday salon use.

Our shears are made with ultimate craftsmanship, ergonomic design, and sturdy robustness, so you never have to worry about your tools again. The supreme Japanese Stainless Steel 440C ensures durability and saves your equipment from any chances of being subject to rust.

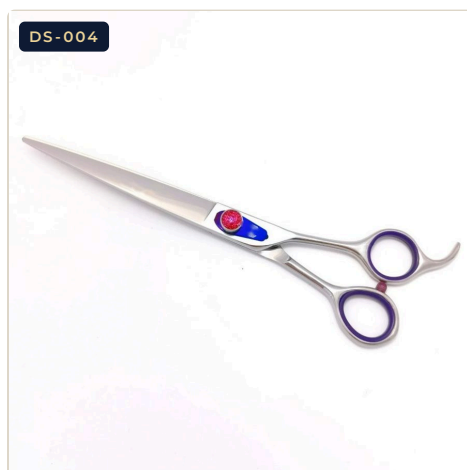

The 7-inch length is ideal for grooming, finishing, and thinning. You can also use it for blending, texturizing, or reducing the weight of the fur. The perfect length allows you to cut a significant amount of hair at a time while giving a neat finish and allowing you to create a shape rather than just randomly cutting straight.

Moreover, the design allows for added comfort for your thumb and finger as the rings support and complement the shape of a human hand. However, if you want further adjustment, you can always remove the rubber inserts used as padding for your fingers.

In addition, the shape of the blades, along with the adjustable screw assembly, allows perfect balance without compromising on the strength of the shears. The sharpness of the blades has also been kept in mind so it can be suitable for all types of furs; whether thick or thin, long or short, curly or straight, the 7-inch straight shear will cut them right through.

Fun fact, it all doesn't end here! Along with uncompromised quality and excellent performance, we have kept it lightweight so that you will not get tired quickly during your grooming sessions.

With these perfect straight shears, your puppy is sure to have a glamorous makeover that you will surely love. So don't sit idle and order your shears today!

7.5 Inch Straight Shears (One Blade Serrated)

- ◆ Japanese Stainless Steel 440C
- ◆ Built-in Finger Rests
- ◆ Premium Quality Construction for Professional Use
- ◆ Heat Treated Blades
- ◆ Maximum Sharpness and Durability
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Ergonomic handle construction for optimal support during prolonged use
- ◆ Removable finger inserts for a customizable fit
- ◆ Durable carrying case
- ◆ Easy to clean

Do your shears get blunt after a couple of weeks, and you are sick of resharpening and cleaning them again and again? Are you facing troubles in grooming sessions due to your poor-quality shears?

If your answer to that query is yes, we have the 7.5 inch straight shears in store that you would find handy in your sessions. The shape of the shears is designed

intelligently to support the structure of your hand and provides you stability and endurance during the cuts.

If your puppy has had a rough look lately and needs a trim, this is surely the type of product that you would want to have. The level of comfort that it

allows is on another level. The built-in finger rests ensure you stay energized while grooming your pet.

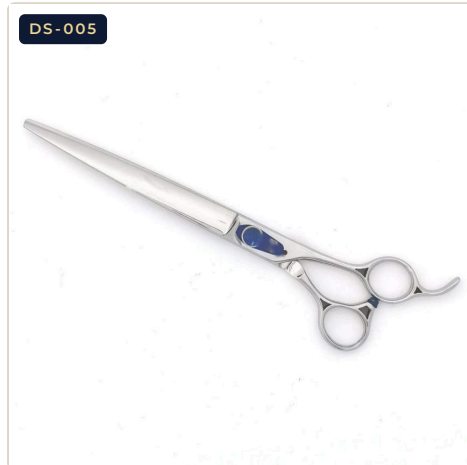

Often, owners of large pets find it a major problem as it takes much more time to give a fine cut to their pets. However, this perfectly sized shear will allow you to cut fast and efficiently with its ergonomic design, sharp sturdiness, and robust build.

You would not have to worry about sharpening the blades now and then as the 440C Japanese steel has been sharpened enough to last a long time before it gets any blunt. Besides, the beveled edges make it hassle-free to sharpen it if needed, and the long-lasting Semi-Convex edges are compatible with almost all sharpeners in the market.

In addition, the design prevents hair from getting stuck in the assembly of the shears, which may cause hindrances during your session. You can also adjust the screw to align the shears with your cutting style and speed so you can work together seamlessly.

Moreover, it has a durable case to carry around without endangering yourself or any other belongings. The shears are the perfect size for length cuts and allow you to make minor adjustments over a large area quickly.

You need these shears to make the makeover possible if you want to give your pets a gorgeous look. There is limited stock left, so order your shears today from Derpa.

8 Inch Straight Shears

Types: Swivel Thumb Ring, Offset Serrated Wider Blade, Offset Copper Holes in Blade, Offset Floral Shank, Offset Floral Shank Black, Offset Floral Shank Purple

- ◆ Japanese Stainless Steel 440C
- ◆ Built-in Finger Rests
- ◆ Offset Concept
- ◆ Black Adjustable Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Silencer Bumper for a Quieter Cut
- ◆ Ergonomically designed for Comfort and Efficiency
- ◆ Lightweight design for easy maneuverability
- ◆ Ideal for General Grooming, Finishing, and Thinning of Coats
- ◆ Smooth and sharp blades

Are you tired of using small, noisy dog shears that do not cut properly and make so much noise that it is almost irritating? Do your shears also get blunt easily and are so heavy that you wish you'd never bought them?

If you are facing these problems, you need to buy the 8 Inch Straight Shears from Derpa today. These shears are exemplary craftsmanship and will allow you to cut your puppy's hair without hassle.

A fascinating feature of these shears is that they are not noisy at all. With the silencer bumper, you get a quieter cut, and you won't have to tolerate the irritating noises that common shears make.

Moreover, the special thumb ring and finger rest allow you to keep your hand and fingers comfortable even during prolonged grooming sessions. The rubber padding inside gives a lush feeling when touched and has a soft effect on your skin.

Unlike common shears, you will find this product by Derpa extremely durable and sturdy, mainly due to the high-quality steel used in manufacturing.

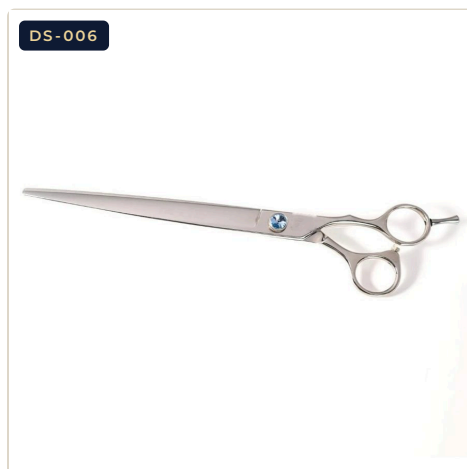

Moreover, the flat screw assembly eliminates any risk of the shears losing their strength over time.

Another added feature is the capability of these shears to provide a harder or softer cut, depending on what you want. The adjustable screw can be tightened or loosened so you can adjust it according to your grooming styles and speed and better apply your techniques.

In addition, the shears are made durable without compromising the maneuvering factor. They are made very light, so you can use them without getting tired and feeling any burden on your thumb and fingers.

Being lightweight might not be considered a major plus point, but the weight of the tools combined contributes greatly to how much your toolkit weighs overall. Hence, if you like to keep all the tools on your body or are constantly moving, this 8-inch straight shear is certainly for you.

Don't sit idle and let your beautiful dog turn into a hairy mess; order your shears today and give them the makeover they truly deserve.

9 Inch Straight Shears

Types: Gold Plated Finger Rest, Big Finger Holes, Removable Finger Rest, Flippable Concept, Long Shanks, Stylish Shanks, Gold Plated Screw Assembly

- ◆ Japanese Stainless Steel 440C
- ◆ Built-in Finger Rests
- ◆ Premium Quality Construction for Professional Use
- ◆ Heat Treated Blades
- ◆ Maximum Sharpness and Durability
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Ergonomic handle construction for optimal support during prolonged use
- ◆ Removable finger inserts for a customizable fit
- ◆ Durable carrying case
- ◆ Easy to clean

Have you been struggling to give a professional finish to your dog's fur but your scissors are too dull and unsharp? Do you want to give your dog an amazing new look without inconvenience? If so, Derpa introduces something amazing for you. Our 9-inch straight shear will help you fulfill your desires and give the best look to your pet that you've wanted for some time now.

Our 9-inch shears have an ergonomic grip that will give you maximum comfort while styling your pup. The sturdy shape and intelligent design allow it to be used on all furs. It doesn't matter if your puppy has coarse or silky hair; this revolutionary product can handle all types.

During the grooming of larger pets, a small-sized shear might not be much convenient as it can cut only a limited amount of hair. However, with the ideal

length of 9 inches, our shear can make your work faster and easier while allowing you to get straight, even cuts all along the pets.

Besides, our shears prevent you from getting tired easily with the swivel thumb ring, which offers comfort while styling. The dynamic handle ensures perfect balance and fits in your hand to help you finish your work without inconvenience.

Whether you want to groom a bulldog or a poodle, Derpa will help execute the task perfectly and aid you in trimming all the sensitive parts of your pup. The 9-inch shears are the most popular in the market lately and are widely

used in grooming. A good reason is that they are versatile and you can use these straight shears for pets of all shapes and sizes. We provide high-quality straight shears to accommodate the grooming of all sizes of dogs.

In addition, the shear comes with a durable carrying case allowing portability while ensuring safety. You can take your shear wherever you want without any stress regarding the shears getting damaged or damaging your other equipment.

Derpa will fulfill all your pet grooming desires, so get your shears fast to upgrade your skills and open an entirely new dimension of possibilities today!

6 Inch Curved Grooming Shears

- ◆ Japanese Stainless Steel 440C
- ◆ Opposing Handle Flipper
- ◆ Double Finger Rest
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Ergonomic handle design for comfort during prolonged use
- ◆ Removable finger inserts for a customizable fit
- ◆ Durable carrying case
- ◆ Soft grip handle for added comfort and control
- ◆ Easy to clean
- ◆ Convex edge design
- ◆ A silencer/muffler attached to reduce noise

Are you tired of using subpar dog shears that dull easily and cause hand fatigue during long cutting sessions?

Introducing the ultimate grooming tool for professional stylists and barbers – the 5 inch Curved Grooming Shears. Made from top-quality Stainless Steel, these shears will withstand any dog grooming task you throw at them.

The opposing handle flipper design allows for precision cutting and control, while the double finger rest provides added stability and comfort. The flat screw assembly ensures a smooth and easy adjustment, and the semi-convex edges are convenient for most sharpeners.

We understand the importance of comfort during prolonged use, that's why Derpa included an ergonomic handle design and removable finger inserts for a customizable fit. The soft grip handle also adds an extra level of comfort and control.

And when it's time to clean the shears, the removable finger inserts make it a breeze. Plus, these shears come with a durable case so that you could take them with you wherever the need to be.

The best feature of these shears is the silencer/muffler attached that will reduce noise helping to improve focus and concentration during grooming sessions.

As a professional dog groomer, you would definitely be aware of the fact that grooming tools play an important role to make perfect cuts and finish. Our 5-inch Curved scissors for Dogs are designed to meet the specific needs of grooming dogs. The convex edge design ensures that your scissors will be sharper for longer, reducing the need for frequent sharpening. The soft-grip handle will reduce hand fatigue, which will allow you to work long hours without feeling uncomfortable.

Moreover, the silencer/muffler attached to the shears will also reduce noise so that you can work in a more comfortable and relaxed environment.

When it comes to grooming dogs, every detail matters. From the cut of the hair to the overall look and feel of the finished product, it's essential to have the right grooming tools for the job. And that's exactly what our 5-inch Curved Grooming Shears provide – the ultimate cutting tool for professional dog groomers.

6.5 Inch Curved Grooming Shears

Colors: Blue, Black, Cream, Red, Silver, Orange Ball Tip Shear

- ◆ Japanese Stainless Steel 440C
- ◆ Ball Tips helps avoid any pokes at the delicate body parts of pets
- ◆ 6 Inch Length for all grooming needs
- ◆ Opposing Handle Flippable
- ◆ Double Finger Rest
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Ergonomic Handle Design for maximum comfort and control
- ◆ Lightweight for easy maneuverability
- ◆ Best for Fur Trimming to Finishing

Do you struggle with using traditional shears that poke and pull your pet's delicate body parts? Do you find it tiresome to sharpen your blades often? Do the shears make it hard for you to complete the grooming process quickly and comfortably?

Our 6 Inch Curved Grooming Shears are the solution to your struggles with traditional shears. Made from high-quality stainless steel, these shears feature ball tips (rounded end tips) to avoid any accidental pokes for extra safety while grooming delicate areas such as the nose, ears, paws, face, eyes, paws, or body.

So enjoy a no-poke experience while grooming your pet's sensitive parts with our curved grooming shears. When used correctly, the ball tip shears provide a smooth and comfortable grooming experience for you and your pet.

Whether you need to add the finishing touches to your pet's coat or little fur, the curved design of the shears makes it easy to achieve a perfect look every time. Whether your dog's coat is long, short, curly, or wiry, these shears will help make grooming more accessible and more enjoyable. Be it a loose-goosy poodle or a fluffy Yorkie, these shears are the perfect choice for any pet groomer.

The opposing handle can be flipped for comfortable left- and right-handed use and the handle features a double-finger rest for more control. Additionally, the flat screw assembly ensures that your shears are always secure while in use and make your pet's grooming process a breeze.

Furthermore, the semi-convex edges are long-lasting and easily sharpenable, while the ergonomic handle design ensures your comfort and control while grooming.

The ergonomic handle design is lightweight for easy maneuverability and offers maximum comfort and control.

No more struggle with the discomfort and inconvenience of traditional shears. Upgrade your grooming kit today with our 6 Inch Curved Grooming Shears to bring your pet grooming services to the next level and give your furry friends the best grooming experience possible. Your pet clients and their owners would surely love the results!

DS-049

7 Inch Curved Grooming Shears

Types: Curved, Flipper, Bent Shank, Slim Blade Serrated

- ◆ Japanese Stainless Steel 440C
- ◆ Metallic Rose Gold Finish
- ◆ Opposing Handle Flippable
- ◆ Double Finger Rest
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Ergonomic Design for Maximum Comfort
- ◆ Lightweight and Durable
- ◆ Ideal for Grooming, Styling, and Cutting Hair of All Lengths and Textures
- ◆ Treated to ensure Maximum Durability

Are you tired of using straight shears that leave your furry dogs with uneven haircuts? Do you struggle to reach those hard-to-get spots on your clients' furry bodies? Do you want to give your clients a professional look all the time? If so, then look no further!

Here comes our new 7 Inch Curved Grooming Shears, the ultimate solution for professional dog groomers everywhere. These shears have been specifically designed to contour your dogs' bodies, providing a precise and even cut every time. The curved blades make it easy to reach those tricky spots, leaving your clients looking and feeling their best.

Derpa 7 Inch Curved Grooming Shears are not only designed for precision and ease of use but they are also built to last. Made with Japanese Stainless Steel, they are durable and resistant to rust and corrosion offering an unbeatable level of strength and sharpness. The metallic rose gold finish adds a stylish touch to the shears, making it look as good as your work!

The opposing handle's flippable design allows for comfortable and versatile use for both left and right-handed groomers. The double finger rest ensures a secure and comfortable grip during long grooming sessions while the flat

screw assembly allows for easy maintenance and adjustment of the shears making sure your shears stay secure and intact during use.

Additionally, the Long Lasting Semi-Convex Edges are convenient for most sharpeners, so you can keep your shears in top condition for years to come.

Our 7-Inch curved grooming shears are the perfect tool for professional groomers to shape and sculpt the perfect look for their clients while providing a comfortable and easy-to-use tool. These shears are specifically made to make grooming more efficient, easier, and more professional.

7 Inch Curved Grooming Shears – Slim Serrate Blade

Colors: Golden, Silver

- ◆ Japanese Stainless Steel 440C
- ◆ Metallic Copper, SERRATED Edges
- ◆ Opposing Handle Flippable
- ◆ Double Finger Rest
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Lightweight
- ◆ Comfortable Grip
- ◆ Perfect for an Easy Trim or Shape-Up
- ◆ Silencer Bumper to Reduce Vibrations and Noise

Do you find it hard to groom certain dog breeds with traditional shears because of their thick, curly, or matted hair? Are you looking for a solution that will make your job easier and more efficient?

Buy our 6.5 Inch curved grooming shears made from high-quality steel that is built to last, providing durability and longevity that you can count on.

The metallic copper edges of the shears are made for long-lasting resilience and protection against rust and corrosion. Thus, the shears can maintain their sharpness and integrity for longer periods, reducing the need for frequent replacements and sharpening.

Moreover, these serrated edges can provide added cutting power for thicker and harder-to-cut hair. The serrations create a saw-like action that can grip

and hold the hair as it is cut, making it more efficient and effective for cutting through matted and tangled hair.

Plus, the curved blades of the shears are specially designed to follow the contours of the dog's body, which can make it easier to achieve a precise, even cut. This could be especially helpful when working on dogs with a lot of curves and angles, such as breeds with puffy or curly hair, helping the groomer to work more efficiently and avoid any discomfort to the dog.

The double finger rest and comfortable grip ensure maximum comfort during prolonged use without getting worried about aches and pains in your hands after long grooming tasks.

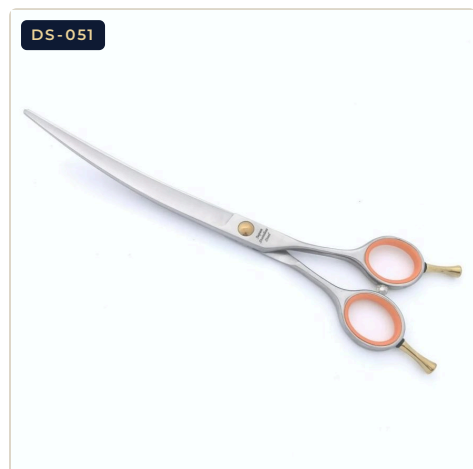

Additionally, the lightweight design and silencer bumper make these shears easy to handle, reducing vibrations and noise for a more pleasant grooming

experience. Perfect for an easy trim or shape-up, these shears are a must-have for any professional groomer looking to elevate their craft.

So, if you are looking for a pair of shears that can be used on all types of coats and sizes, then our 6.5 Inch curved grooming shears are perfect for you! Whether your dog has thick, curly, or matted hair, our shears can efficiently

and effectively cut through any type of coat without causing discomfort to your pet.

Without any further ado, order your 6.5 Inch curved grooming shears today! Not only will you be able to serve your customers better by achieving the perfect style and look, but you will also be able to save time, money, and effort.

7.5 Inch Curved Grooming Shears

Types: Curved, Narrow Blade, Serrated Blade

- ◆ Japanese Stainless Steel 440C
- ◆ Built-in Finger Rests
- ◆ Offset Concept
- ◆ Black Adjustable Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Silencer Bumper for a Quieter Cut
- ◆ Ergonomically designed for Comfort and Efficiency
- ◆ Lightweight design for easy maneuverability
- ◆ Ideal for General Grooming, Finishing, and Thinning of Coats
- ◆ Smooth and sharp blades

Have you gone exhausted using straight shears that just don't cut it when it comes to grooming your furry dogs? The constant strain on your wrist and fingers, not to mention the uneven cuts, can make grooming sessions a real pain. But have no fear, because our 7.5 Inch Curved Grooming Shears are here to save the day!

Made with premium-grade Stainless Steel, these shears are built to last and provide a precision cut every time. The built-in finger rests and offset concept design reduce strain on your wrist and fingers, making grooming sessions a breeze. The black adjustable screw assembly allows for a customizable fit, while the semi-convex edges are convenient for most sharpeners.

Additionally, a silencer bumper is included to provide a quieter cut, making grooming sessions more peaceful. Ergonomically designed with comfort and efficiency in mind, these shears are lightweight and easy to manoeuvre allowing you to work comfortably on your pets' fur without experiencing too much strain. Perfect for general grooming, finishing, and thinning of coats, these shears make the perfect addition to any grooming kit.

With our 7.5 Inch Curved Grooming Shears, you'll never have to worry about tedious grooming sessions again. Whether you need a precise trim or just a

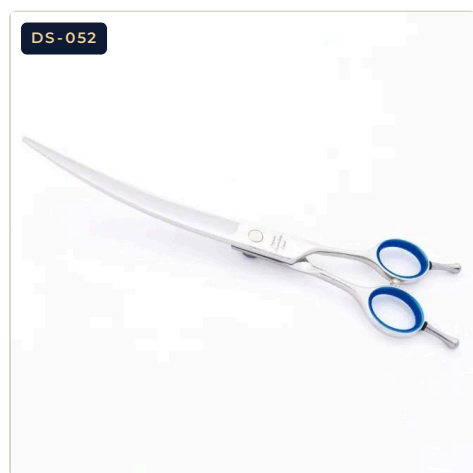

neatening up of the coat, these shears are sure to provide a perfect cut every time. Best for all dog breeds, these shears can make short work of even the thickest coats.

No matter if your pup needs a trim before the holidays, or needs to look extra special for the summer fun, these shears can prove very handy when it comes to giving your furry best friend the perfect look.

Moreover, they are easy to clean and won't rust or corrode. Because of this, they are an excellent choice for professional groomers who want to keep their shears in top condition.

These shears do not damage the fur and provide smooth, sharp cuts that leave your pup looking its best. Unlike other shears, these are completely safe to use on sensitive areas like the eyes, ears, and muzzle. So you can groom your pup with confidence knowing that it is getting a smooth cut without any discomfort.

Without getting its paws into the mess, get ready to give your dog a complete grooming experience with these shears! Order now and make your clients happy every time with the perfect cut.

Super Curved Grooming Shears

Sizes: 7 Inch, 7.5 Inch

- ◆ Japanese Stainless Steel 440C
- ◆ Opposing Handle Flipper
- ◆ Double Finger Rest
- ◆ Adjustable Black Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Ergonomic Design
- ◆ Sharp Blades
- ◆ Anti-Slip Handle
- ◆ Lightweight & Easy to hold

Have you been struggling to maintain the sharpness of your grooming shears despite spending too much? Now you don't need to waste your money on dull, ineffective shears as Derpa brings in high-grade stainless steel Super Curved Grooming Shears.

These are designed with semi-convex edges that are easy to maintain and sharpen, allowing you to achieve professional results with every cut. The super curved dog grooming shears come with premium-quality built, making them highly durable.

Also, the blades are sharp and long-lasting, ensuring that you don't have to sharpen them too often making them great value for money and a must-have grooming tool for any professional pet groomer.

Moreover, the sharp blades slice through fur more easily, reducing the risk of tugging or breaking hairs which can be uncomfortable for dogs. This allows for more precise and accurate cutting, especially when working around the contours of the dog's head and face. With our shears, professional groomers can easily trim the necks, legs, and other body parts of the dogs more smoothly and evenly.

Additionally, the curved shape can help to prevent injury to the dog by reducing the chances of accidentally poking or nicking them with the shears.

Using curved shears also makes it easier to create layers or angles in the fur which allows for greater styling options.

Groomers can achieve anything from smooth curves to sharp angles quickly and efficiently with these specialized tools. Not only does this save time but it gives groomers the ability to produce excellent results every time.

Plus, the ergonomic design of the opposing handle flipper makes it comfortable to use and easy to manoeuvre. To give you a better grip while using the shears, the handles are also anti-slippery which makes the shears lightweight and easy to hold without causing any strain on your hands. Ideal for a more natural and comfortable grip, our curved grooming shears can reduce hand fatigue and strain.

Along with that, the adjustable black screw assembly lets you customize the shears according to your preference, while the double finger rest provides a firm holding position.

Make your dog grooming services easier with Derpa extreme Super Curved Grooming Shears. Get them now and achieve professional results with every cut.

"Transform your grooming game with the Derpa 13 Tooth Chunker Shears – the ultimate tool for professional dog groomers and saloons!"

Derpa 13 Tooth Chunker Shears are a professional dog groomer's go-to solution for all common issues. These shears are made especially for all saloons and professional dog groomers to make their work simpler and more effective. You can easily handle even the thickest and heaviest of coatings because of its unique 13 teeth design and Japanese Stainless Steel 440C construction.

Hand tiredness is one of the main issues that groomers deal with. These shears' built-in finger rests provide comfort and control while in use, enabling you to work for extended periods of time without developing hand fatigue. Even the toughest dogs are simple to groom because of our 13 Tooth Chunker Shears. Uneven cuts are another issue that groomers deal with. These shears have an adjustable screw mechanism that enables you to set the tension to your

preferred level, guaranteeing a uniform and flawless cut regardless of the coat's thickness or texture. With so many various breeds and coat kinds to deal with, saloons can really benefit from this function.

A key problem for groomers is maintaining the sharpness of their shears. Because these shears' long-lasting semi-convex edges are adaptable to most sharpeners, you can maintain their sharpness and condition, guaranteeing that each cut is as accurate as the last. This function is crucial for saloons since they constantly need to sharpen their shears.

These shears were created to address the issues that saloons and professional dog groomers deal with on a regular basis, thereby simplifying and streamlining your work.

Experience the accuracy and effectiveness of the Derpa 13 Tooth Chunker Shears right away. Place your order right away to experience the difference.

17 Tooth Chunker Shears

- ◆ High quality Japanese 440C stainless steel
- ◆ Works great for face and details on small dog breeds
- ◆ Lightweight with superior smooth precision
- ◆ Features an offset handset and flat adjustable tension screw

Most breed dogs have sensitive skin. Low-quality shears can cause severe allergies and rashes in dogs due to excessive use of blades over the same skin area. These unpleasant experiences cause a lot of pain due to the dogs. Dog groomers are always hunting smooth edge shears, but unfortunately, the stuff in the market is way below standard.

Shih Tzus, poodles, and schnauzers are prone to matting, and most dog grooming saloons don't deal with them with care. Poor dogs always need help in grooming sessions as their dense coats are usually stuck in the shears and must be trimmed swiftly. Thinning and blending issues are also common problems for Professional Dog Groomers.

Derpa has been a revolution in the dog grooming industry. With their fantastic range of shears, they minimize dog groomers' tensions. There are high-quality shears that work well with most dog breeds. We have come up

with solutions to all the grooming problems from matting to other thinning & blending problems.

Our 17 Tooth Chunker Shears is a handy product for professional dog groomers due to their versatility and catchy features. They are made with more teeth than typical grooming shears, making it easier to grasp and remove larger fur clumps. 17 Tooth Chunker Shears are a specialized tool that professional dog groomers use to remove matted fur from a dog's coat. With this smart tool, you are now able to perform the thinning & blending with the client's dog in an efficient manner. All these problems are now a thing of the past.

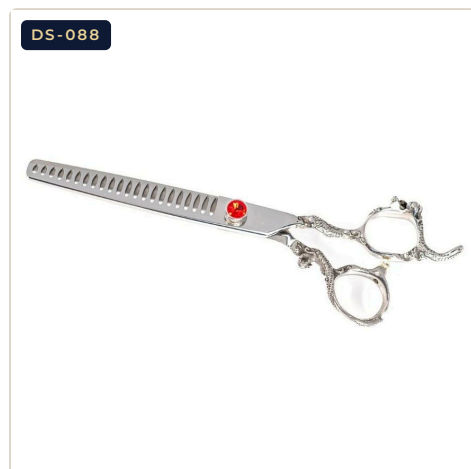

They are designed with a larger number of teeth than standard grooming shears, which helps to grip and remove larger clumps of fur more easily. These shears are particularly helpful for mat-prone dogs with long, dense coats, such as Shih Tzus, Poodles, and Schnauzers. The 17 teeth with the aid of the shear in

breaking up and removing matted fur, speeding up and refining the grooming procedure.

These Derpa 17 Tooth Chunker Shears are a blessing in disguise for all dog groomers. In addition to eliminating matted fur, these shears can be used to shape and trim the coat and thin out too-thick sections of the coat. It enables

the groomer to give the coat a more natural and even appearance. Additionally, the 17 teeth make it simpler to merge various coat components, resulting in a more seamless transition between different fur lengths.

Say Goodbye to Matting, Rough Cuts, and Skin Allergies with 17 Tooth Chunker Shears.

20 Tooth Chunker Shears

- ◆ Silver Color
- ◆ Ultra sharp and durable
- ◆ Distinct look and comfortable grip
- ◆ Extremely smooth cutting action and results
- ◆ Japanese Stainless Steel 440C
- ◆ 24 Teeth, 8 Inch Chunker
- ◆ Built-in Finger Rest
- ◆ Adjustable Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners

Professional Dog Groomers now don't need to suffer with low quality shears for the basic problems of Dull Blades and Hand Fatigue issues. Derpa has been a game changer for all Professional Dog Groomers. Our 20 Tooth Chunker Shears are here to solve all these expert dog groomers' problems. With their smart edges and ergonomic style hand grip, the experts now can perform the grooming and create top-class styling for their client's dogs.

Some other common issues of the expert dog groomers are that, over time, the blades on their chunker shears become worn and lose their sharpness. This makes it difficult to make precise cuts and causes hand fatigue. Also, the screws on them get loosened easily, and the blades may not align properly. It results in uneven cuts and makes it difficult to control the shears. The rough blades on most chunker shears are also bent or damaged easily. As a result, they may not cut properly and cause uneven cuts.

Professional Dog Groomers work with different kinds of breeds. If the chunker shears are not ideal for the type of coat you are working with, it may be challenging to achieve the desired grooming results.

When it comes to the solution to these problems, the best tool is Derpa 20 Tooth Chunker Shears. These shears have 20 precisely constructed teeth and are 7-8 inches long. They are tailor-made to make grooming quick, simple, and effective.

The 20 teeth produce clean, accurate cuts every time, so say goodbye to uneven cuts and jagged edges. The shears are sturdy, premium Japanese

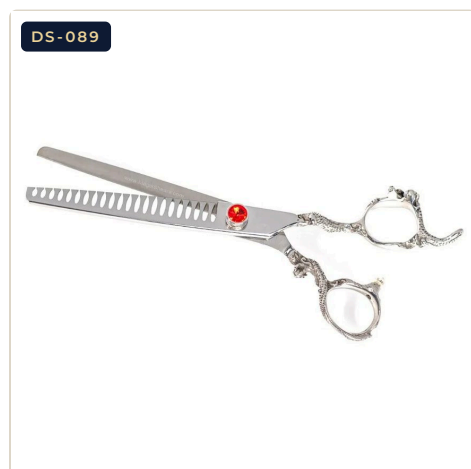

stainless steel that will hold up to daily use and not readily dull. It will reduce the hand fatigue issue.

Our chunker shears have a special Flat Screw Assembly that doesn't get loose quickly, and the blades remain intact and aligned for a smooth cutting experience. They possess Long Lasting Semi-Convex Edges convenient for most Sharpeners. The Blades are also in perfect shape. These features make them durable and long-lasting. High-quality blades reduce injuries and uneven cuts.

It is usually a headache for groomers to give different dog breeds a unique and fashionable look. These Chunker Shears from Derpa is excellent for texturizing and shaping, making them the best choice for creating distinctive and stylish cuts for all dog breeds. These shears will be valuable to your expert dog grooming toolset.

In conclusion, the Derpa 20 Tooth Chunker Shears are a top-notch grooming tool that provides accuracy, toughness, comfort, and versatility. They were made with the professional groomer in mind. These shears are necessary for any professional dog groomer due to their user-friendly features of Japanese Stainless Steel 440C, Double Finger Rest Flipper, Twisted Rings, Flat Screw Assembly, and Long Lasting Semi-Convex Edges.

Because of their accuracy, toughness, and comfort, Derpa 20 Tooth Chunker Shears are a need for all professional dog groomers. With the aid of these shears, you will be able to get the ideal trim every time, improving the image and goodwill of your dog grooming business.

22 Tooth Chunker Shears

Sizes: 7 Inch, 8 Inch

- ◆ Japanese Stainless Steel 440C
- ◆ 22Teeth, 7 Inch Chunker
- ◆ Fancier Shank and Rings
- ◆ Built-in Finger Rest
- ◆ Adjustable Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Red Gem Stone

22 Tooth Chunker Shears are a necessary tool for every expert dog groomer. Chunker Shears made from Low-grade materials are more likely to rust, making the blades dull. Poor-quality shears have poor hand grip that causes discomfort. They might not survive as long as high-quality ones, demanding a more frequent replacement. Derpa 22 Tooth Chunker Shears are quality shears that are rust free, built with ergonomic hand grip, and are more durable.

Derpa is known for its quality dog grooming shears. The 22 Tooth Chunker Shears from Derpa is the ultimate solution for all professional dog groomers!

They have some fantastic features like semi-convex edges, Japanese stainless steel 440C, Fancier Shank and Rings, Built-in Finger Rest, Adjustable Screw Assembly, and 7-8 inch length with 22 teeth.

How 22 Tooth Chunker Shears from Derpa is a blessing for Professional Dog Groomers?

With Derpa 22 Tooth Chunker Shears, the problems mentioned above for dog groomers are a thing of the past.

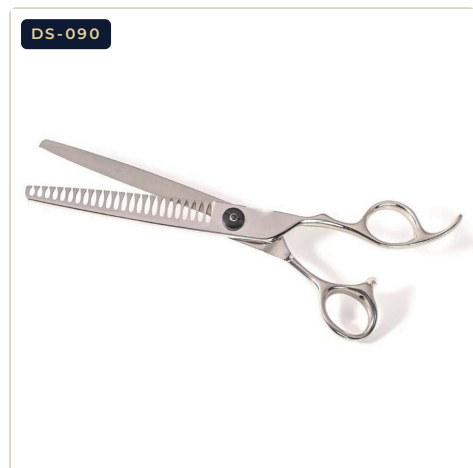

These shears are made of high-grade Japanese stainless steel, which is very resistant to rust and corrosion, so you won't have to worry about rusting when using them. Also, they offer a comfortable grip and allow fine control since they are ergonomically created to lessen hand fatigue and pain.

Derpa 22 Tooth Chunker Shears are made to survive intensive use and last for a very long period so that you can anticipate a long lifespan from them. They are designed to be strong and durable, reducing the risk of breaking.

Professional groomers can use them for prolonged periods without problems because they are made to withstand rigorous use. They are lightweight, which makes them easy to maneuver, reducing hand fatigue and allowing for a smooth grooming experience.

In conclusion, dog grooming pros should choose the 22 Tooth Chunker Shears from Derpa. Its features, such as Japanese Stainless Steel 440C, 22 Teeth, 7-8-inch Chunker, an integrated finger rest, an adjustable purple screw assembly, and durable semi-convex edges, can be used by groomers to make their work easier and more comfortable.

Upgrade your grooming tools with the 22 Tooth Chunker Shears from Derpa. Order yours today and experience the difference in your grooming results!

With Derpa 24 Tooth Chunker Shears, they can effortlessly create all sorts of wavy styles with a classic natural look. It is an amazing product that is giving great support to expert dog groomers. These shears also overcome the hand strain issue with their smart ergonomic style hand grip.

Some other problems the expert has experienced are the thick hairs of dogs that cause matting and tangling with substandard chunkers available in the market. Allergies and skin issues are common concerns that professional dog groomers encounter. Repeated use of low-standard and dull chunkers makes the issue worsens.

With poor-quality chunkers, keeping pace with the latest grooming trends and styles is challenging. They are a big hindrance in introducing new cool grooming styles that can attract more clients. They are not durable and get dull quickly, which results in changing them more often. It increases the operating cost of the business and, in the end, results in business losses.

The 24 teeth of Derpa 24 Tooth Chunker Shears are ideally spaced to enable smooth cutting without pulling or tugging at the hair. Every time, the result is a clean, smooth cut. It makes getting rid of tangles and mats simpler without hurting the dog.

They are the perfect solution for hassle-free cutting and classy styling! With its smart features, the groomers can solve their problems and give a fantastic

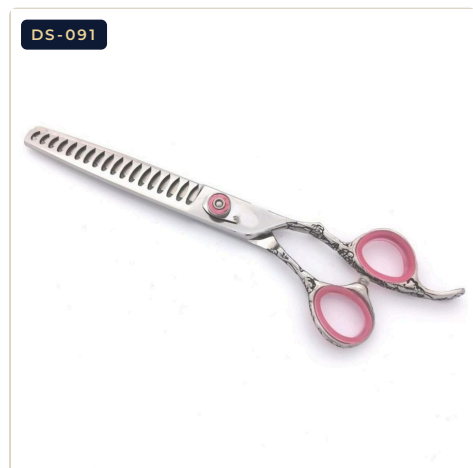

grooming experience to their client's dogs. Groomers may maintain a relaxed grasp and control over the shears with the help of the incorporated finger rest featured on our 24 Tooth Chunker Shears. As a result, the groomer may experience less hand ache and be better able to handle nervous or aggressive dogs with composure.

These shears are made of the best Japanese stainless steel, resistant to rust and corrosion, and can help against skin infections. Groomers can use these shears with confidence because they are rust-free. They are a must-have item for stylists who want to produce cutting-edge and modern looks since they are ideal for making textured layers. This feature enables groomers to create fashionable hairdos for their clients.

Derpa' 24 Tooth Chunker Shears are built to last and can withstand wear and tear from regular use. This suggests that they are a dependable and long-lasting tool that won't need to be changed frequently, which can lower a grooming service's operational costs.

These shears are a highly recommended product for dog groomers. Its features, such as Japanese Stainless Steel 440C, 24 Teeth, 7-8-inch Chunker, finger rest, adjustable purple screw assembly, and long-lasting semi-convex edges, can help groomers provide dogs with an enjoyable grooming experience.

Take advantage of this opportunity to elevate your cutting game with these high-quality 24 teeth Chunker Shears. Order yours today and experience the difference for yourself!

No matter how expert a professional dog groomer you are, chunker thinning shears are a must-have for everyone. Some kinds of hairs can only be trimmed with chunking shears.

One of the most serious difficulties that dog groomers extensively face is the removal of bulk hairs from thick coats. Maintaining the natural shape of the dog's coat is a challenging task. Low-quality chunking shears cannot thin out the naturally dense areas of the coat. This issue is big enough to give headaches to professional dog groomers.

Matting and tangling in the coat is a tough job. Even the experts sometimes have no answer for the matting and tangling while grooming the dogs. It takes a lot of precious time, and at the end of the day, it affects sales and business as extra time is wasted. Polishing and beautifying dogs is a demanding job. Frequent occurrences of these issues have a negative impact on the business's reputation.

But it would be best if you stopped worrying as Derpa is in the town to provide the best quality chunkers that will solve all the problems of the

professional groomers and the saloon owners. Our chunker thinning shears are one of our best-selling products due to their high quality and unique features.

Derpa chunker thinning scissors will quickly remove the bulky hairs from thick coats in no time. The convex blades that are amazingly smooth and sharp will give the best natural shape and look to the dog's hair. Our chunker thinning shears will swiftly thin out the thick hair areas with the help of leaving some hair intact. These shears allow dog groomers to create the most natural and balanced hair shape.

Now, dealing with the problematic matting and tangling issues is a problem of the past. Our Derpa chunking shears are high-quality shears that easily trim off bulky and thick hairs without any effort or trouble.

Overall, our chunker thinning shears can help professional dog groomers work more efficiently and effectively by making it easier to remove bulk, eliminate matting and tangling, and create a sophisticated look for the dogs.

Dog Grooming is a vast industry these days. Professional Groomers are always looking for high-quality shears that will enhance their business. Due to low-quality shears, they are facing multiple problems. The trimming of thick hair is a major issue for professional dog groomers. Substandard Dog grooming curved chunkers blade gets dull and rough quickly, resulting in unsmooth cuts and bruises.

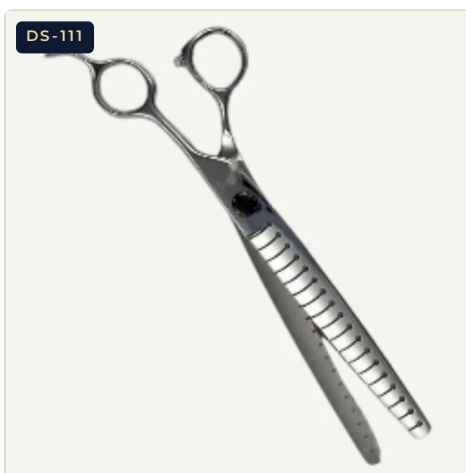

Another issue with these low-quality curved chunker shears is poor hand grip. Professional dog groomers have lots of clients to satisfy. Poor hand grip results in hand fatigue, decreasing quality, and increased dog grooming time.

Derpa has introduced high-quality Dog grooming curved chunkers that are a blessing in disguise for all those who are into the Dog Grooming business. Some amazing kinds of shears are available that are good enough to provide smooth and carefree grooming. Our curved chunkers are in demand due to their sharp and smooth blades.

The best part is that our chunkers dog grooming scissors are best for more extended cutting periods and don't get rough quickly. Their essential USP has made it a hot-selling product for professional dog groomers. They have smart edges that ensure smooth and hassle-free cutting. Professional dog groomers don't need to worry about hand fatigue, as it has one of the best ergonomic hand grips. There is less pressure on the hand, and the grooming is effortlessly done much more quickly.

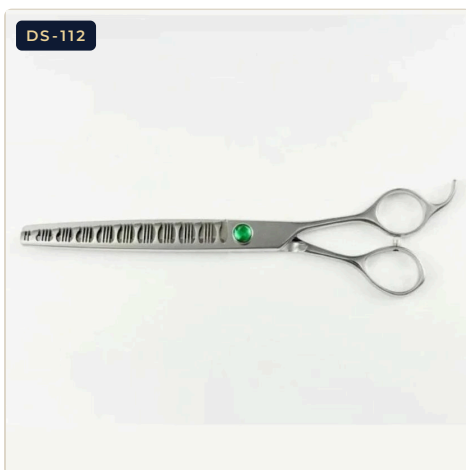

Our Derpa Dog grooming curved chunkers work well with almost all breeds. Thick and coarse hairs can be trimmed very quickly with our chunkers. Whether you are working with Poodle or Bichon Frise, it works well on all of them.

So, bring Derpa Chunkers for your saloon, and grow your sales and customer base.

DS-116

Everyone wants their dogs to stand out from the rest. They take their dogs to the best salons for grooming. But unfortunately, sometimes the groomers find it challenging to give the best shape as they use substandard shears available in the market. Most professional groomers do not have multiple shears for different kinds of dogs, so they find it hard to satisfy their clients. They usually don't have the mini chunker shears that are the must-have for grooming.

Even those who have them usually have low quality and rough small chunker shears, with which it is difficult for groomers to work with tangled fur without pulling or tugging in the dog's skin. The dogs' nails can be only trimmed through sharp and smooth mini chunker shears; otherwise, it causes discomfort or even injury with poor quality small chunker shears.

Derpa has come up with the answer to all problems of professional dog groomers. Our Mini Chunker Shears are a high-quality product that will

ensure the best grooming for the client's dogs. The quality of our shears is next to none. Our small chunker shears are made of Japanese stainless steel with sharp convex blades that perform with fantastic smoothness.

Now, professional groomers don't need to worry about the issue of pulling or tugging on the dog's skin. Derpa mini chunkers did the best trimming without any such problems. With smart edges, it very easily trims the nails of the dogs. It works well and prevents the dogs from injuries during nail cutting.

Our Derpa Mini chunker shears are best for removing unwanted fur from a dog's ears, paws, and face, keeping them clean and tidy. All professional groomers must grab Derpa chunkers to provide the best services to their clients.

Derpa chunkers are the game changer for Professional Dog Groomers and Saloons.

DS-117

Professional Dog Grooming Chunkers

- ◆ Built for durability and style
- ◆ Tension is easily adjusted by the inset tension screw

Professional Dog Groomers face a lot of problems while doing grooming sessions for their clients. With routine and low standard shears, the thick and hard hairs are usually not trimmed easily. There are chances of cuts and skin rashes due to the overuse of shears.

Derpa is introducing Professional Dog Grooming Chunkers, the ultimate solution for maintaining your dog's coat. Our chunkers are specially designed for professional use; they provide a comfortable and efficient user experience. They work on different breeds of dogs and smoothly trim the dog's fur.

The design details on our Professional Chunkers are incredible. The sharp, stainless steel blades provide rapid and precise grooming, while the ergonomic design ensures a pleasant hold for the groomer. The chunkers are safe and easy to use thanks to a safety lock and other features.

Your dog's coat maintenance issue will be resolved with the help of Derpa Professional Dog Grooming Chunkers, making it simple to keep your dog looking its best.

These chunkers are made to ensure that your dog's coat is perfectly groomed while also making the grooming process as quick and simple as possible. The chunkers are ideal for trimming the fur on any portion of the dog's body, whether it be on tiny or large breed dogs. Depending on your preference, these chunkers can shave your dog's body, legs, or face. They also do a great job of cleaning up the fur on the dog's ears, paws, and tail.

In our range of smart chunkers, Professional 7.0" Dog Grooming Chunkers Scissors take the lead. It is tailor made for Professionals. It will do wonders with your client's dog grooming. The smooth and convex blades are perfect to beautify the dogs. Grooming experience from these chunkers is the ultimate experience that will ensure your dog will win a lot of beauty competitions.

Professional Dog Grooming Chunkers are a terrific investment for any dog owner because they are simple to use and maintain. In conclusion, these are multipurpose, effective, and secure items that can assist you in resolving the issue of maintaining your dog's coat and making it simple to keep them looking their best.

Thinning Shears

Thinners and blenders for softening lines and controlled texturing. **25 models**

DS-123

Double Sided Thinning Shears for Dogs

Sizes: 6" - 30 Teeth, 6.5" - 48 Teeth, 7" - 48Teeth

- ◆ Made from high-quality Japanese Stainless Steel
- ◆ Seamless Thinning with no lines or marks
- ◆ Adjustable Screw Assembly
- ◆ Durable Semi-Convex Edges convenient for most Sharpeners
- ◆ Built-in Finger Rest
- ◆ Lightweight and Comfortable Design

Professional dog groomers using double sided thinning shears for dogs that become dull and rough quickly can not easily satisfy their clients who expect their dog's grooming to be completed faster. With Derpa Double Sided Thinning shears, you don't have to worry about the heavy chunk remaining since their smooth and sharp edges give a quick and unflattering grooming experience without leaving any marks.

Low standard professional double sided thinning shears don't often give the quality feeling of texture and fail to create volume. Our double thinning shears cut and provide the edge to hair from both sides, with great results as the hair becomes more textured. These thinners are gaining popularity among dog grooming professionals with their premium quality.

These shears have exclusive features that make them a perfect addition to the expert's toolkit. Our double-thinning shears come 6-7 inches, with as many as 48 sharp teeth on both sides. They are made from Japanese Stainless Steel

440C that ensures strength and durability. The blades don't get rough easily and give a smooth grooming experience.

Similarly, Copper Color Titanium Plasma Coating makes the tool more solid and robust. There will be no hand fatigue due to the Built-in Finger rest feature. It keeps less strain on the hand during grooming. Another important feature of Adjustable Screw Assembly helps to adjust the screw with respect to the dog's breed and the thickness of their hair. Semi Convex edges are long lasting and enhance the life of the tool.

Derpa double sided thinning shears for dogs are a must have item for Dog grooming professionals. They help reduce the time in the grooming session and improve the quality with their sharp and strong edges. The Manufacturing of Japanese Stainless Steel 440C makes them highly durable. The other exclusive features of Copper Color Titanium Plasma Coating, Built-in Finger Rest, Adjustable Screw Assembly, and Long Lasting Semi-Convex Edges make it a perfect companion for Expert Dog groomers.

Professional dog groomers who are natural lefthanders find it difficult to perform grooming as they require special Left handed shears that suit their hand grip. They suffer from the problems of scissors, discomfort, lack of tools, and injury concerns. Derpa has taken care of these special needs of left-handers and exclusively made Left handed thinning shears for dogs and left-handed curved thinning shears.

The lefthanders can enjoy their grooming sessions as they don't have to face scissor discomfort. Normally the shears are designed by keeping the majority of right-handers in mind. It causes the issue of scissor discomfort with the lefthanders. They also lack options for them, resulting in injury concerns. Thanks to Derpa, all these problems are over for the lefthanders.

Our left-handed thinning shears and curved thinners are designed exclusively for expert groomers with some fine features. They are high-quality shears

manufactured by Japanese Stainless Steel 440C that add durability and make them work for a longer period of time without getting dull and rough. Built-in Finger Rest releases pressure from the hand and removes any hand fatigue. Professional Groomers work easily with them without any stiffness in hand. Moreover, the adjustable screw assembly and long-lasting semi-convex edges add value to these tools.

Derpa takes care of the needs of left-handed professional dog groomers. With our Left Handed Thinning Shear, they can now easily perform their grooming activities with great ease and effectiveness. Some terrific design details like Japanese stainless steel 440 C, Adjustable screw assembly, Semi Convex edges, and built-in finger rest are enough to make them formidable shears for expert dog groomers.

Expert dog groomers suffer from multiple problems in performing regular grooming sessions. Professional Thinning Shears are an important element of their toolbox. The problem is that quality professional thinning shears for dogs are hard to find in the market. With these low-quality grooming instruments, it is tough to deal with dogs having dense fur, overgrown hairs, matting, and

tangling. Blending also becomes challenging to mix various lengths of fur for a more equal, natural look when using poor-quality shears. Derpa has high-quality professional thinning shears that will solve all these problems of experts.

Also, the dogs competing in dog shows require thinning shears that are sharp and smart. It is challenging to attain the appropriate shape or look for show dogs using low-category thinning shears.

Derpa has the smartest solution to all these problems with our high quality and smart Professional Dog grooming thinning shears.

How will Derpa Professional Thinning Shears bring ease into the life of Professional Dog Groomers?

They can effectively reduce a dog's coat's thickness, making it more manageable and simple to comb. In particular, when a dog's fur has gotten too long, our thinning shears are a valuable tool for managing the length of the fur. They help remove mats and tangles from a dog's fur.

These can be used to do a blending job for a more equal and natural appearance. For show dogs, a certain shape or appearance can be achieved with the help of our expert thinning shears for dogs. The dog can appear more aesthetically pleasant and professional by trimming excess fat and shaping the coat.

- ◆ Japanese Stainless Steel 440C
- ◆ Built-in Finger Rest
- ◆ Adjustable Blue Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Curved Point Down
- ◆ Handles and finger rests are contoured for maximum comfort

Derpa innovative shears are the perfect answer for the grooming problems of professional dog groomers. With our high-quality, sharp 10 Inch Dog Grooming scissors, they can achieve the right look for each dog they groom. The easy movement and precision cutting of these sharp shears are unbelievable.

To keep your pet buddy looking their best, use our Derpa 10 Inch Dog Grooming Shears. The ergonomic handle design ensures a comfortable grip, decreasing hand fatigue and enhancing your and the dog's enjoyment of grooming sessions. All groomers should own a pair of our premium shears.

Our shear's long blades enable more accurate and effective cutting, which can assist paid groomers in finishing many dogs' grooming tasks faster.

Derpa is a versatile tool for professional groomers because they can be used for various grooming jobs, such as trimming and shaping the coat and removing knots and mats. Our shears are strong and long-lasting since they are made of premium stainless steel, which can assist professional groomers in avoiding having to replace equipment as frequently.

Using high-quality professional shears can assist them in giving the dog a polished and professional look, which can draw in more clients. Business groomers can boost their productivity and accuracy by using our magical 10-inch dog grooming shears, enabling them to serve their clients better and, eventually, grow their businesses.

7 Inch Dog Grooming Shears

- ◆ 7 inch curved scissors
- ◆ Made of 440c Japanese stainless steel
- ◆ Ergonomic design and removable rubber finger inserts
- ◆ Bevelled edge blade for sharpening
- ◆ Every pair is hand polished and tested

Any dog groomer needs shears, and selecting the appropriate size and length can have a significant impact on the outcome. The most common scissor blade lengths among dog groomers are thought to be between 7 and 7.5 inches.

The problem is the lack of quality shears in these sizes. Professional Dog groomers are always in search of top class shears that will make their job easy.

Derpa has come up with an amazing collection for dog grooming professionals. Our 7 Inch Dog Grooming Shears have been a revolution for all groomers.

Their lengths are perfect for shaping and finishing the dog's coat since they enable control and precision. Additionally, because they are not excessively long, they do not remove a lot of hair at once, which might be advantageous for more cautious groomers. This is crucial since it can prevent any unintentional dog injuries or cuts.

Our Medium scissor blade lengths are adaptable and can be used for a variety of various grooming jobs in addition to being effective for shaping and finishing. They can be used for body clipping and scissoring in addition to trimming the dog's face, paws, and tail.

The fact that our 7 Inch Dog Grooming scissors are simple to handle and control is one of their key advantages. They are comfortable to handle and move around for lengthy periods of time because they are not overly heavy. This is crucial for professional groomers because they can be working on several pets at once.

Some of our top 7 Inch shears are Double Thinner 7" (48 Teeth on Both Blades), Chunker 7" (24 Teeth), and Curved Shear 7" Flipper. They are made from Japanese Stainless Steel 440C. Other impressive features include Built-in Finger Rest, and Long Lasting Semi-Convex Edges convenient for most Sharpeners.

If you are a professional dog groomer, without any further delay visit our website to witness some of the best 7 Inch Dog Grooming Shears in town.

DS-145

8 Inch Dog Grooming Shears

- ◆ Right-hand scissors
- ◆ Convex Edge results in a smoother, silkier cut
- ◆ Adjustable dial system
- ◆ Japanese Hitachi 440C stainless steel
- ◆ Excellent quality professional grooming shear
- ◆ Opposing/straight handle shear is perfect for flipping it over – can curve up or down

Both poodles and bichon frises require routine grooming due to their thick, curly coats. However, dog groomers may encounter specific difficulties when trimming their hair.

Dealing with the curls is one of the biggest challenges when cutting a poodle or Bichon's hair. These breeds have naturally curly coats, which can be challenging to cut. The dog's body shape may be difficult to detect due to the curls, and the hair may become tangled in the scissors. It may result in uneven cutting and an unsatisfactory grooming experience.

The coat's thickness is another problem. It might be challenging to shave through the dense, thick coat of poodles and bichon frises. This may make it challenging to achieve a smooth and clean cut. To prevent any problem, it's crucial to use sharp scissors and to take breaks to sharpen them while you cut.

Derpa has come up with the perfect grooming solution for Professional grooming shears. We have introduced the 8 Inch Dog Grooming Shears

collection. These long shears are ideal for grooming poodles and other breeds with curly and thick hair.

It is crucial to understand the breed's standard cut and to have Derpa 8 Inch Dog Grooming scissors, such as Chunker 8" (24 Teeth), Curved Shear 8" (Wider Rings), or Straight Shear 8", to handle the particular needs of the coat, to avoid these problems. There is a fantastic variety of 8 inch shears to choose from. They have sharp edges, are made from Japanese Stainless Steel, and are highly durable and long-lasting. Other catchy details include Built-in Finger Rest and Long Lasting Semi-Convex Edges.

In conclusion, cutting the hair of Poodles and Bichon Frise might be difficult at times, but with Derpa quality 8-inch grooming instruments, it is possible to produce a polished appearance and satisfy the needs of your clients. Our grooming shears will assure you of winning back and retaining your happily satisfied clients.

DS-146

9 Inch Dog Grooming Shears

- ◆ 9 inch curved scissors
- ◆ Made of 420c Japanese stainless steel
- ◆ Adjustable tension knob for precision
- ◆ Ergonomic design and removable rubber finger inserts
- ◆ Bevelled edge blade for resharpening
- ◆ Every pair is hand polished and tested

It might be difficult for dog groomers to remove thick hair from a dog's coat. Dealing with the coat's thickness is one of the critical problems. Some breeds have thick, double coats that can be challenging to remove, including the Old English Sheepdog, Bernese Mountain Dog, and Saint Bernard. It may make it hard to perform hassle-free grooming sessions.

The length of the hair is another problem. Breeds with long hair, including the Afghan Hound, Shiloh Shepherd, and Great Pyrenees, can be challenging to groom when removing large amounts of hair. This may result in uneven cutting and an unsatisfactory client.

Derpa has answers to all these grooming issues of professional dog groomers. We have an outstanding range of 9 Inch Dog Grooming Shears that will help groom almost all the dog breeds mentioned above.

Utilizing our variety of 9 Inch Dog Grooming scissors will help in getting the desired appearance. For instance, a more natural and polished appearance can be achieved by using our Curved Shear 9" or Straight Shear 9 Inch to eliminate tangles. The high-standard sharp shears will ensure the smooth grooming of dogs.

Doing the grooming sessions will take less time with our smart 9 Inch Dog Grooming Shears. Professional groomers can easily handle more clients at a time. Eventually, it will help exceptionally boost your business.

In conclusion, eliminating bulk hair from a dog's coat can be difficult, but with the help of Derpa, it is possible to produce a polished and expert appearance. All professional groomers need to visit our online store. Don't forget to place orders at Derpa!

Curved Fluffers for Dogs

- ◆ Japanese Stainless Steel 440C
- ◆ Opposing Handle Flippable
- ◆ Double Finger Rests
- ◆ 44 Teeth Called Piano Teeth for creating Unique textures on assorted breeds
- ◆ Fluffer grooming shear
- ◆ Flat Screw Nut Assembly
- ◆ Hand-sharpened Semi-Convex cutting edges
- ◆ Comfortable hold
- ◆ Standard 25° curvature
- ◆ Ergonomic handle design
- ◆ Curved finger rings
- ◆ Micro-serrated blades for no slips or snags

Are you looking for a way to increase your efficiency and comfort as a professional dog groomer? If yes, look no further than our budget-friendly curved blending shears designed specifically for heavy workloads.

These shears are made from top-grade stainless steel having high density, hardness, and excellent rust resistance.

The shears are equipped with opposing handles which can be easily flippable for the convenience of the user and make the blending process faster and hassle-free.

Moreover, the curved finger rings make it easy to hold the shears with a comfortable grip. Along with that, the ergonomic handle design makes it easy to hold and the micro-serrated blades prevent slips and snags providing a smooth and definite cut.

Plus, the double finger rests provide a comfortable hold while the 38 teeth called 'Piano Teeth' help you create unique textures on assorted breeds. Isn't that great? In addition to that, you get a flat screw nut assembly which makes the shears easy to adjust.

What's more? These curved blending scissors come with a silencer incorporated in the shears that reduces noise and vibration while cutting, so

you can groom your pet without any distractions.

And don't forget, the shears come with a standard 25° curvature and hand-sharpened semi-convex cutting edges for a smooth, effortless cut.

Made by professional craftsmen, the joint of the blade makes the adjustment and motion of these curved shears quite fine with less sound to motion and everlasting resistance.

To create a beautiful style with a sophisticated look, this scissor cuts the dog hair without pits, which makes the hair fluffy.

Made to be used safely on sensitive parts of the dog, you can trim your pup's hair perfectly on the face, ears, legs, nose, tail and head with our curved blenders.

The smooth, sharp and precise cut that these curved shears provide is unbeatable!

So, what are you waiting for? Get your hands on these Curved Blending Shears for dogs and show some love to your fur buddy by grooming with ease and more comfortably!

DS-149

Dirty Dog Shears

- ◆ Japanese Hitachi 440C stainless steel
- ◆ Adjustable dial system
- ◆ beautiful true rose gold titanium
- ◆ convex edge results in a smoother, silkier cut
- ◆ slight bent down thumb hole for extra comfort

When it comes to dirty dog grooming, there are a variety of difficulties that can arise. Their coat's dirt and particles can thicken and strand their hair, making it challenging to trim it evenly and neatly. Grooming equipment can also become dull from dirt and debris, which reduces its effectiveness.

Derpa has come up with the solution to all these problems. We have an extensive range of Dirty Dog grooming Shears that will make life easy for all dog owners and professional dog groomers.

Our smart clipper has a unique blade that can be used to clean up any debris before cutting. To prevent pulling or tugging on the tangles, it's also crucial to use sharp scissors or clippers while trimming a dirty dog's hair.

For cutting through thick, matted coats, straight shears from Derpa is a suitable alternative. They feature a straight, sharp edge that cuts through

mats and knots with ease without yanking or pulling on the hair.

Another useful tool for slicing through dense, matted coats is our pair of thinning shears. They can be used to thin out the hair and get rid of mats and tangles without removing a lot of hair at once because of their serrated edge.

Hair around the ears, face, and paws can be cut with the help of our curved shears. They can be used to provide a softer, more natural look because of their curved blade, which enables more precise cutting.

Dirty dog grooming shears from Derpa is a blessing in disguise for all dog owners and professional groomers. Do visit our online portal for one-window grooming solutions for dogs.

DS-150

Dog Grooming Shears for Golden Retrievers

Sizes: 7 Inch, 8 Inch

- ◆ Made from high-quality Japanese Stainless Steel
- ◆ Multi Colour
- ◆ Seamless Thinning with no lines or marks
- ◆ 30Teeth on Each blade
- ◆ Rainbow Titanium Plasma Coating
- ◆ Built-in Finger Rest
- ◆ Adjustable Screw Assembly
- ◆ Durable Semi-Convex Edges convenient for most Sharpeners

Golden Retrievers are one of the most beautiful dog breeds. Their beauty and grooming demands a lot of effort and thought process. They possess thick, multiple layers that may mat and tangle easily. These mats and tangles can be uncomfortable for the dog and difficult to cut cleanly if shears are used that are dull or are wrong in size.

Although Golden Retrievers are recognized for their friendliness and social nature, some dogs may experience fear or anxiety when being groomed. This may make it difficult to properly groom them and damage or hurt the dog.

A jagged, uneven appearance can be caused by using shears that are too sharp or by cutting too much hair at once. Use shears that are the proper size and sharpness for your Golden Retriever's particular demands.

To obtain the required length and appearance, it's crucial to maintain a good balance and employ the appropriate equipment and procedures.

Derpa has come up with all the solutions to the grooming problems of Golden Retrievers. We have a wide and authentic range of Dog grooming Shears for Golden Retrievers. You can select the most suitable shears from our smart and sharp straight shears, thinning shears, curved shears, and blender shears.

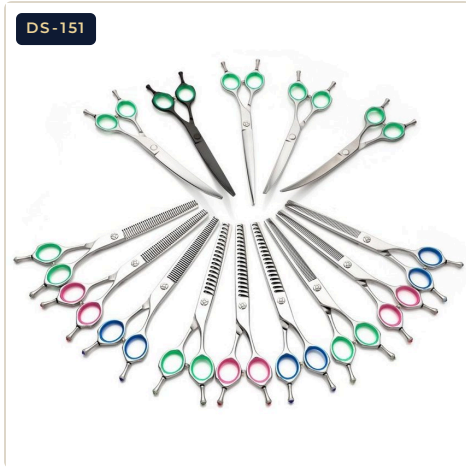

Our Dog grooming scissors for Golden Retrievers are made from Japanese stainless steel which makes them highly durable and long-lasting. They come in various sizes, and with sharp edges that ensure smooth and hassle free cutting.

With our fine set of grooming shears, home users can easily take care of all the grooming of their Golden Retrievers. If you happen to be in the grooming business, you can provide the best grooming sessions and increase your business portfolio of satisfied clients.

Dog Grooming Shears for Poodles

Sizes: 6 inch, 7 Inch, 8 Inch, 9 Inch, 10 Inch

- ◆ Japanese Stainless Steel 440C
- ◆ Double Finger Rest
- ◆ Flat / Adjustable Screw Assembly
- ◆ Semi-convex edges are suitable for everyday grooming
- ◆ Reliable performance

- ◆ Provides an effortless cut through even the coarsest of coats

Of all the dog breeds, poodles are among the most easily recognizable. They are mostly known for their fashionable appearance. People love keeping poodles at home because of their beauty and smartness. The grooming demands of these dogs are different from other breeds.

Like any dog, poodles might experience hair-cutting issues like clogging, sticking, or sensitivity to specific grooming products. Regular brushing and maintaining your poodle's hair at a controllable length will help to prevent these problems.

Additionally, employing the proper grooming methods and products, such as a de-matting tool or slicker brush, can help to reduce hair cutting issues. Every Poodle haircut has extremely particular guidelines about the placement and length of the hair puffs and pompoms. Dog grooming Shears for poodles are a bit different from other dog shears.

Some poodle owners learn their grooming themselves by getting the best Dog Shears for poodles, and some take them to the nearest dog grooming salon. Derpa has the solution for all poodle owners and business groomers. We

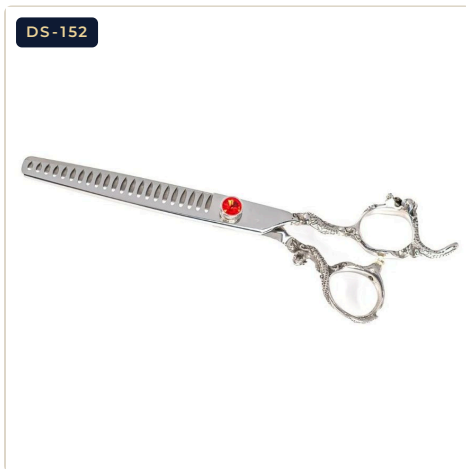

have an amazing variety of poodle grooming scissors that will groom your dog with great style.

Curved Shear 6.5" (Slim Blade Serrated) is an ideal poodle grooming shear. It is made from top quality Japanese Stainless Steel 440C with Metallic Copper, and Serrated Edges. It has an extremely comfortable grip handle. 6.5-inch serrated blade scissors for perfect body trimming for any poodle. There are smooth blades for trimming body fur. For close bodywork on your pet's face and paws, use micro-serrated edges.

This is just one fine example of our tailor made shear for poodles. You can also select from our wide range of straight shears, curved shears, and thinning shears, for carefree poodle grooming.

Our poodle grooming shears will transform the look of your poodle. If you are the owner of a dog grooming business, our instruments will bring the magic to your customer's dogs and eventually increase your business.

So, be carefree and get the best shears for poodles from Derpa for a wonderful outlook.

Gem Dog Grooming Shears

- ◆ Sharp cutting edges
- ◆ Japanese Stainless Steel 440C
- ◆ Opposing Handle Flippable
- ◆ Double Finger Rest
- ◆ Adjustable Screw Assembly

Gem Dog is a breed of dog known for having long, silky Hair. Expert groomers can create the best styles for a classy outlook with these soft hairs. The biggest challenge with their Hair is that they are prone to tangling and matting. Their cutting needs the specific gem shears that give the dogs perfect grooming. It is essential to use a high-quality pair of scissors or clippers that are sharp and designed explicitly for cutting long Hair.

Derpa has a smart collection of Gem Dog Grooming shears that are the perfect solution to the cutting needs of gem dogs. Now, you need to sit and relax and see the magic of Derpa. We have specially designed instruments with sharp edges that give smooth and hassle-free cutting.

So, for all Gem Dog shearing needs, visit Derpa and have some real magic!

Gold Dog Grooming Shears

- ◆ Gorgeous rose gold titanium coating
- ◆ Excellent economical hair cutting shear
- ◆ Japanese Hitachi 440C stainless steel
- ◆ Beautiful carved floral design on the handles
- ◆ Semi-Convex edge and hollow ground blades
- ◆ Clear crystal dial adjustable click tension system

Any dog with a golden-coloured coat can be referred to as a "Gold Dog," regardless of breed. However, hair trimming can present some problems like any other dog breed. The hair of a Gold Dog is frequently thick and coarse, which can cause sticking and tangling. It is one of the usual problems while trimming Gold Dog hair.

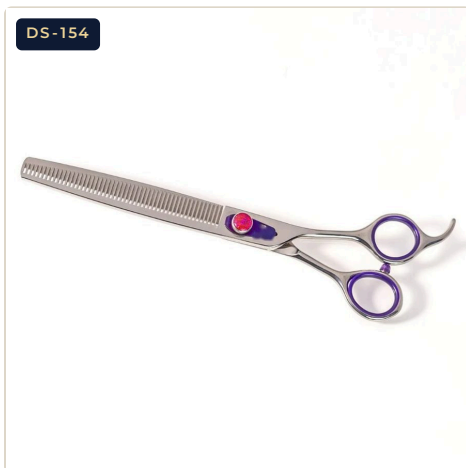

The hair may pull and tug if the clippers or scissors used to cut it are dull. It can cause the dog discomfort and lead to an uneven cut. Sensitive skin: Some Gold Dogs may have sensitive skin, and cutting their hair too close to their skin may cause irritation and discomfort.

To avoid these issues, it is recommended to use the Gold Dog Grooming Shears by Derpa. We have exclusively designed the shears that satisfy the

needs of Gold Dog's grooming. We use superior rose gold shears and a set of scissors made specifically for cutting long hair. Our Gold Straight Shears are high-quality pet grooming, perfect for tough jobs or heavy coats.

You can select the best shears from our thinners, straight shears, curved shears, and chunkers category for more effective and efficient grooming of your Gold Dogs. With little knowledge and care, you can easily do all the grooming jobs yourself with our shears.

Derpa products are equally famous among salon owners. They are fond of using our shears for easy and beautiful grooming sessions for their client's dogs. Order your shears from us and let Derpa take care of your dog's grooming problems.

Professional Blending Shears

Sizes: 6.5" - 32 Teeth, 7.75" - 50 Teeth

- ◆ Japanese Stainless Steel 440C
- ◆ 7.75 Inch & 6.5 inch
- ◆ Built-in Finger Rest
- ◆ Adjustable Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Lightweight and Balance for precise control
- ◆ Safe and Comfortable
- ◆ Smooth and comfortable motion
- ◆ Multipurpose dog grooming shears

It can be quite annoying to spend time and effort on grooming your furry friend, only to end up with less than satisfactory results. But with our professional blending shears, you can achieve professional-looking haircuts for your pup in the comfort of your own home.

Yes, you read it right! Crafted from a premium steel material with a great combination of high toughness and super hardness, these shears have 50 razor-sharp teeth and a 7.75-inch length for professional salon-worthy styling.

The built-in finger rest provides an ergonomic grip for comfortable use, while the adjustable screw assembly ensures optimum control during use. All you need to do is position the proper angle of the regulator allowing you to easily adjust the screw tightness.

The scissors have blunt tips that help protect your furry dog's skin from being wounded. Plus, the semi-convex edges make blending hassle-free for maximum longevity. To make your four legs and family members cuter, these shears are a valuable assistant to cut the toughest tangles and thickest fur.

Lightweight yet durable, the shears are perfect for all types of dog grooming tasks, from tapering and blending to thinning and texturizing evenly without

splitting or damaging hair ends.

With its smooth motion capabilities, perfect results are guaranteed every time! Moreover, this multipurpose professional blending shear can help you style your dog in different looks with ease and a smooth finish.

So get ready to experience professional quality dog fur cutting like never before with these magical professional blending shears! Best for pet families, salons, and hospitals to use on large and small dogs, these are ideal for any dog breed homeowner.

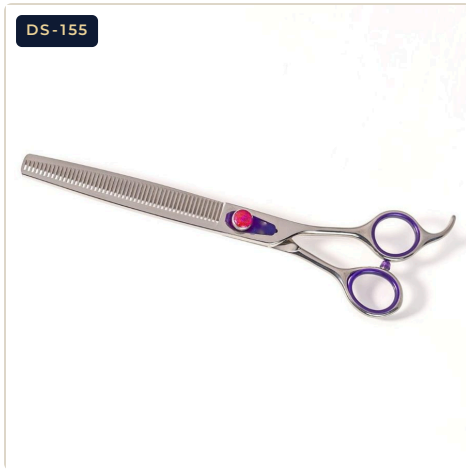

As the name implies, these professional blending shears are perfect for creating a seamless blend between two different lengths of hair. Whether you are cutting multiple layers or just adding a little texture, these shears will give you an excellent non-slippery grip to achieve your desired look.

Believe it or not, these blending shears can make your desired cut beyond your expectations and you'll never want to try another. Buy your pair of shears today and make a difference in your pup styling experience.

Professional Dog Grooming Shears

Sizes: 6 Inches, 7 Inches, 8 Inches, 9 Inches, 10 Inches

- ◆ Forged from High Quality 440C Japanese Steel
- ◆ Convex/Bevel blades
- ◆ Seamless Thinning with no lines or marks
- ◆ 48 Teeth on Each blade

- ◆ Copper Color Titanium Plasma Coating
- ◆ Built-in Finger Rest
- ◆ Adjustable Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Perfect for bulk cutting

Usually, dogs possess delicate skin. The naked eye can't spot it. The skin becomes burned during grooming sessions at saloons as the instruments repeatedly touch the affected area.

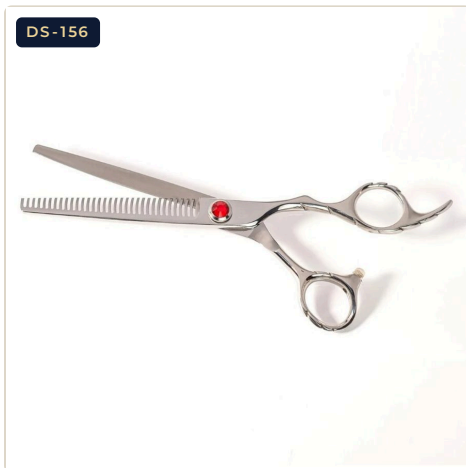

Razor burn can also result from using razors on skin that is already sensitive. The dog may experience discomfort, irritation, and even inflammation as a result of this. When grooming dogs with sensitive skin, it's critical for groomers to be aware of this risk and exercise extra caution, using the right professional dog grooming shears and procedures to prevent discomfort or harm.

All difficulties associated with grooming dogs with sensitive skin can be resolved by using Derpa professional grooming shears for dogs. Because of the particular blade geometry in our shears, accurate cutting may be accomplished without pulling or tugging on the hair, lowering the possibility

of skin irritation or razor burn. The blades are also made of high-quality stainless steel that is simple to keep and clean, preventing the growth of bacteria or dulling of the blades. Additionally, the ergonomic grip of our professional grooming shears reduces hand strain and enables simple, accurate control, making grooming more pleasant for both the groomer and the dog. You may make sure that your dog is groomed accurately, safely, and comfortably with the help of our product.

Derpa has made life easy for all such dog & saloon owners. We are operating online as a one-window operation. We are offering some of the best professional dog grooming shears for our esteemed customers. We extensively cover a wide range of commercial dog grooming shears.

If you like our product, then don't forget to hit the Add to cart button.

Reversible Blending Shears

- ◆ Japanese Stainless Steel 440C
- ◆ 38 Teeth, 6.5 Inch
- ◆ Opposing Handle, Reversible
- ◆ Flat Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ The muffler on the Handles for Quieter Operation
- ◆ Double finger Rest for Comfort
- ◆ Fine-tuning bearings
- ◆ Sharp distinct blades
- ◆ Anti-Slip Design

You might be struggling with dull, heavy scissors during grooming sessions, leaving your furry friend with uneven and uncomfortable cuts. Let go of the mundane scissors and say hello to our new reversible blending shears for dogs made with stainless steel.

The shears let you enjoy effortless grooming with 38 teeth along a 6.5-inch long edge that makes cutting a breeze. This perfect pair of blending shears helps you cut with the teeth up or down and keep a neutral position for precision blending.

Unlike other traditional blending shears, the uniquely shaped grooves on each tooth of this shear take in more hair, allowing you to trim through sections quickly and easily – without any pulling or snagging.

With our professional blending shears, you may smoothly blend fringe or fine hair with precision control.

The best feature of these shears is the reversible handles which make the scissor easy to maneuver while offering a multitude of options and angles for cutting. The anti-slip ergonomic handle design promises a safe and secure grip for desired cutting, making it an ideal choice for professional groomers and pet owners alike.

Additionally, a detachable double finger rest provides extra comfort, reducing hand fatigue during long grooming sessions.

Along with that, the shears fine-tuning bearings offer a quick cut, no matter how intricate the grooming needs may be.

And yes, we know your dog needs a silent cutting operation which is now made easy with these shears that allow a peaceful and quiet grooming session, thanks to its muffler on the handles that reduces the friction of the handles.

Besides, they are completely safe to use on sensitive or fragile coat types so you can use them freely on your pet whatever the breed or coat type.

Whether you want to create a smooth and silky coat or a more textured and rugged look, our unique blenders are the perfect tool for the dog grooming job. They are designed to make grooming sessions faster, more efficient, and more enjoyable for both you and your pup.

So, if you're looking for a high-quality and versatile tool to help you achieve the perfect look for your furry friend, order your reversible blending shears today from Derpa.

Small Dog Grooming Shears

- ◆ Japanese Stainless Steel 440C

- ◆ Curved blade

DS-157

- ◆ Opposing Handle Flipper
- ◆ Double Finger Rest
- ◆ Adjustable Black Screw Assembly
- ◆ Long Lasting Semi-Convex Edges provide a smooth cut
- ◆ Durable Cryogenically tempered material

Small size dogs have their own charm and attraction. If you own a Maltese dog, shih tzu, or bichon frise, they demand extra care. When it comes to grooming, little dogs might pose special difficulties. Due to their small stature and delicate characteristics, it can be challenging to use larger grooming tools and scissors, which can result in uneven trimming or unintentional nicks and cuts on the dog.

In addition, the finer, more delicate hair of little dogs is sometimes prone to matting and tangling, making it challenging to give them a smooth, equal haircut. They require small dog grooming shears to get groomed properly.

If you are the owner of such breeds of dogs or even own a dog saloon, then you don't need to worry about their grooming. Derpa has the widest range of dog shears for grooming small dogs. We have sharp bladed shears that will trim your dog's hair with great ease and comfort. For small dogs, we recommend small grooming scissors for ideal grooming sessions. These instruments may have more delicate tips and smaller blades, which make it simpler to maneuver around tiny details.

Our Double Thinner 6" is a perfect shear for small breeds. It will transform the beauty of your dog immensely. With our small grooming scissors, the owners can do the hair trimming of dogs at home without any hassles. If you are into the business of dog grooming, there are many special shears in the collection of Derpa. You can visit our collection and take the best instrument that is best compatible with your dog's grooming.

Curved Shear 6" is also another smart shear for small size dogs. It is a perfect item for your dog's cutting. It is made from high quality Japanese Stainless Steel 440C. Its price is affordable and lightweight for smooth operation. Its other impressive features are Double Finger Rest, flat screw assembly, and Long Lasting Semi-Convex Edges convenient for most Sharpeners.

For small breed dogs, Curved Shear Slim Blades Serrated 6.5" is also a special item that will result in a smooth and flawless grooming session. There are many other classy shears that will do wonders with your dog's grooming. It is advised to visit our collection at Derpa to select the best scissor for your dog's cutting.

7 inch scissors are an essential item for the toolkit of any expert. Professional left handed dog groomers need the 7 inch left handed scissors specially made for their hand needs. The conventional right-handed tools don't give them the desired grip and cause more pressure on the hand, which can also cause an injury. Derpa has ended all these grips and hand fatigue issues with our 7 inch left handed scissors tailor made for left handed experts, and they have a special built in finger rest for a perfect left hand grip.

These left handed professional grooming shears of 7 inch size have been a blessing for them. Now they can efficiently work on their clients' dogs effortlessly. The lack of perfect tools for left handed dog groomers makes them feel less confident in their work. With our 7 inch left handed professional grooming shears, they can improve their confidence and grow professionally.

Our 7 inch left handed scissors are manufactured from premium Japanese Stainless Steel 440C material. That makes them highly durable and competitive for expert groomers. One of the critical features of these shears is the adjustable screw element. By just rotating the screw, you can quickly alter

the tension. It will make the shears feel easy in your hand as per the requirement. This remarkable feature ensures better control and accuracy and provides you the luxury to go through even the toughest grooming with relaxed hands.

Another feature that makes them valuable is the long lasting semi convex edges. They are perfectly sharp and don't get dull quickly. It makes the shears sharp enough for longer periods and ensures smooth, hassle-free grooming for dogs.

Derpa 7 inch left handed professional grooming shears are the ideal companion for left handed experts. Now, they don't have to face any poor grip issues with the conventional right hand shears, thanks to our specially designed 7 inch scissors for expert left-handed dog groomers. With our catchy features of a built-in finger rest, Japanese stainless steel 440C, adjustable screw assembly, and long lasting semi convex edges, this product is a must have item for all professional left handed dog groomers.

DS-160

7.5 Inch Left Handed Thinning Grooming Shears

- ◆ Japanese Stainless Steel 440C
- ◆ Lightweight
- ◆ Opposing Handle Flippable
- ◆ Double Finger Rest
- ◆ Flat Screw Assembly
- ◆ semi-convex edges are suitable for everyday grooming
- ◆ Reliable performance
- ◆ Provides an effortless cut through even the coarsest of coats

The right-handed configuration of conventional grooming shears causes discomfort in gripping for left handed expert dog groomers and gives lower grooming productivity. Also, the substandard left-handed grooming shears don't give precise cuts as they rough up quickly. Now, you no longer have to compromise with inferior products thanks to Derpa 6" Straight Left Handed Grooming Shears, which has a built-in finger rest and reduces hand tiredness. Their smart edges will also solve the issue of rough and dull shears for expert dog groomers.

With perfect left-hand shear in hand, not only will the cutting standard improve for expert dog groomers, but they can now bring innovation to work by introducing more styles that were not possible early on.

All left-handed professional dog groomers require our 6" Straight Left Handed Grooming Shears. These shears are made of premium Japanese stainless steel 440C, which is renowned for its strength and resistance to rust and are intended to offer comfort and precision.

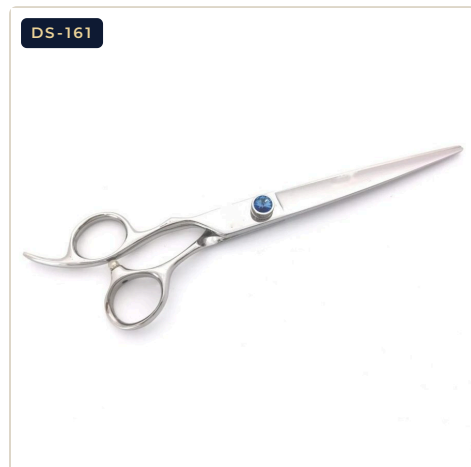

The adjustable screw component is one of these shears' significant characteristics. You may easily change the tension by turning the screw, making the shears feel lighter or heavier in your palm as you choose. This function makes greater control and accuracy possible, allowing you the assurance to handle even the most challenging grooming jobs with ease.

Our shears are made with the understanding that sharpness is crucial to creating a clean and accurate cut. It is simple to keep your shears' sharpness even after frequent use, thanks to the durable semi-convex edges, which are

handy for most sharpeners. These shears will enable you to produce a polished finish every time, regardless of whether you are shaping, trimming, or scissoring.

Therefore, every left-handed professional dog groomer needs our 6" straight left-handed grooming shears. These shears are made to last with long-lasting

semi-convex edges and high-quality materials. They also have a built-in finger rest and adjustable screw assembly. Say goodbye to stress and aggravation and hello to a seamless grooming experience with our 6" Straight Shears for Left Hands.

8 Inch Left Handed Grooming Shears

- ◆ 8" inch Shear
- ◆ Japanese Stainless Steel 440C
- ◆ Built-in Finger Rest
- ◆ Adjustable Blue Screw Assembly
- ◆ Long Lasting Semi-Convex Edges convenient for most Sharpeners
- ◆ Curved Point Down
- ◆ Handles and finger rests are contoured for maximum comfort

For medium and large dog breeds, the 8 inch grooming shears suit. But if there is a left handed professional groomer, it requires an 8-inch left-handed professional grooming shear that is tailor made for the left hand. Using right hand shear will not give the perfect hand grip and will put more strain on your strong hand. With Derpa 8 inch left handed shears, you are now at ease. The tailor-made design for your left hand and built-in finger rest will ensure smooth and perfect grooming for medium and large dog breeds.

Our 8 inch tool has made life easy for all the left handed dog grooming experts. It will give them support for a flawless grooming experience. With its unique features, they can now take dog styling to another level.

These shears are manufactured with Japanese Stainless Steel 440C material, making them robust and long-lasting. Due to the adjustable screw assembly,

they can alter the tension and increase or decrease it according to the dog's needs.

Additionally, the shears have long lasting semi convex edges that are highly durable and enhance the life of the shears and improve the standard of grooming as they don't get dull quickly.

The 8 inch left handed professional grooming shears are a perfect tool for left handed professional groomers. Thanks to their classy features, they are designed for left-handed experts to give them an edge over conventional right-hand shears. With catchy design details like Japanese Stainless Steel 440C material, adjustable screw assembly, built-in finger rest, and semi convex edges, this is undoubtedly a must-have item in every professional dog saloon.
